

COMP 4350 Project Iteration 2

Group D (Votee)

Implementation and deployment: (5.5/7)

- End-to-end, fully working (back-end, front-end, DB, and AWS) features for the user stories planned for iteration 2. (2.5/4)
 - Basically the only feature that is working end to end is about questions. Other features like view grade, adding new course and so on is not working end to end. (-1.5)
- Correctly deployed service on AWS (3/3)

Comments:

- You have couple of development tasks in your Trello such as deploy MongoDB on AWS, basically, you need to distinguish them by label or tag from stories.
- Looking at your current implementation and remaining stories, you need to ensure all your features are working end-to-end as you have limited amount of user stories.

Bugs:

- Under professors home, clicking on view submission does nothing, create new course redirect to home page.
- Under students home, view grades does nothing.

Testing: (10/10)

- Back-end unit tests for the new and old classes (2/2)
- Front-end unit tests (e.g., using Jasmin) (3/3)
- At least one integration test per detailed story (2/2)
- Selenium. at least one automated end-to-end test per user story. (3/3)

Comments:

- You have limited number of test cases! Mainly for questions feature, you need to have more test method in your upcoming iterations!

Design and documentation:**(4.5/5)**

- Good programming practices **(1/1)**
- Proper design patterns **(2/2)**
- Normal level of refactoring in the code-base toward a better design, in every iteration. **(0.5/1)**
- Basically, your project structure is messy, you need properly package your documents, your logs (SLACK) and any other configurations. (-0.5)
- a RESTful service (or any alternative) **(1/1)**
- A missing API documentation (or missing info such as the location of the service and how to use it). **(0/-1)**
- A missing installation guide for anything that is not in the documentation, like any special setting if required. **(0/-1)**

Comments:

- Your API documents must be in PDF format, please export it as PDF and include it in your upcoming iterations.
- Custom packages have proper structure which is good.

Process and planning:**(3/3)**

- Team's communication and members' contributions **(2/2)**
 - Look at the logs of the meetings (or if they use external messaging tools, then a log of those tools).
- Following the plan **(1/1)**
 - The plan should be followed and be updated with the details about the next iteration (detailed stories plus their cost and priorities).

Comments:

- There is only one minutes of meetings, plus the communication channel is through SLACK and the plan document is on Trello.

Total**(23/25)**
